FEATURE EVENT:

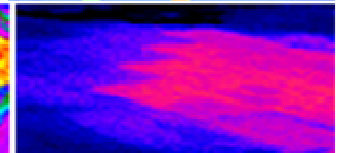

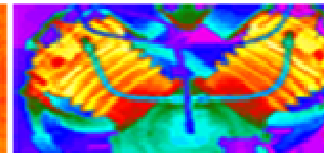

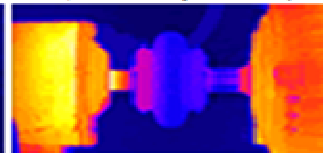

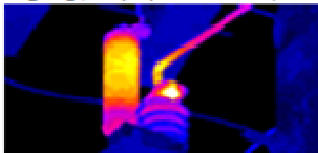

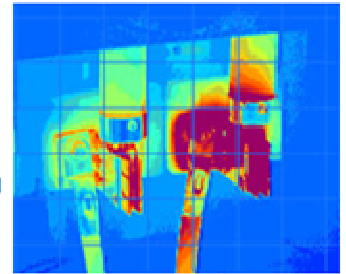

Section Meeting -

Wednesday, March 17, 2010

⇒ All invited, including non-members! ⇐

# Advances in Equipment & Applications of Infrared Thermography

During the past decade the use and application of infrared thermography has increased significantly. Technological advances in thermal imagers, combined with greater public awareness and lower equipment costs have pushed thermal imaging into almost every aspect of business and commerce. In addition to increased use in predictive and preventive maintenance, thermal imaging has seen significant growth as a tool for process monitoring and control. Focus will be on proper application of thermal imaging, equipment capabilities, and ways to help ensure success.

**March Speaker:**

**R. James Seffrin – Director, Infrasppection Institute**

Jim has been an Infrasppection Institute Certified Infrared Thermographer® since 1984. He is a co-founder of Jersey Infrared Consultants and a practicing thermographer with over 20 years experience as an infrared consultant. A Level III Infrasppection Institute Certified Infrared Thermographer®, Jim has written numerous articles, co-written existing standards, and frequently works as an expert witness on projects involving thermography. Jim has been teaching for Infrasppection since 1995.
